

## Environmental Officer

**Do you want to help maintain habitat for North Canterbury's trout, salmon and gamebirds?**

North Canterbury Fish and Game Council is a statutory body charged with managing freshwater sports fisheries and game bird populations on behalf of angling and hunting licence holders. Protection and enhancement of trout and game bird habitat and the wider natural environment is an obvious priority, but the North Canterbury region is changing rapidly.

The Council is looking to appoint an enthusiastic Environmental Officer to join our team based in Christchurch. The successful applicant will primarily undertake duties associated with the Resource Management Act including field inspections, consent monitoring and submissions to regional and district plans to help maintain and enhance sports fish and game bird habitat into the future. This is your opportunity to make a difference in conserving our region's natural resources.

We would like to hear from you if you have some or all of the following attributes:

- A true passion for the environment and its sustainable use
- Well developed oral and written communication and negotiation skills.
- A sound knowledge of resource management and conservation legislation.
- A tertiary qualification in resource management, science or a related field.
- Relevant work experience, particularly in environmental planning.
- Strong computer skills
- The ability to work as part of a small but dedicated team.

A job description can be downloaded from the careers section of the Fish & Game website: [www.fishandgame.org.nz](http://www.fishandgame.org.nz) or by contacting the North Canterbury Fish & Game office.

Applications close on Tuesday, 12th October 2021 and should be addressed to:

Officer Manger  
North Canterbury Fish and Game Council
